

PULP EQUALIZER

> EQU-T model

For permanent stirring and homogenizing of disintegrated pulp samples

PULP EQUALIZER

APPLICABLE ESTÁNDARS

Zellcheming Instruction V/6/61 part F

GENERAL INFORMATION

Equipment to homogenize a disintegrated pulp sample for a correct sheet forming. Before sheet forming with beaten and disintegrated pulp, the pulp shall have the same content of fibers for the first and also for the last sheet, which is made from one suspension probe. Therefore the Equalizer stirs the suspension permanent so, that the pulp properties will not change significantly.
